

Java Vocabulary In-Class Quiz

In class, closed book

There are 50 keywords in the Java language:

abstract	assert	boolean	break	byte	case
catch	char	class	const*	continue	default
double	do	else	enum	extends	false
final	finally	float	for	goto*	if
implements	import	instanceof	int	interface	long
native	new	null	package	private	protected
public	return	short	static	strictfp	super
switch	synchronized	this	throw	throws	transient
true	try	void	volatile	while	

What to do:

Know or memorise the definition of each and be able to write at least one Java statement example using the keyword.

Sample format:

keyword: int

definition:

you would write: *declares a variable as a primitive data type that only allows integer, numerical values*

example statement:

you would write: *private int. age;*
