Assignment 2

1) What is the product sale for each country in South America?
   I believe that visualization 2 works the best in answering the question. Visualization 2 clearly shows the total product sales for each country. It also shows which companies have the highest sales in descending order. Visualization 1 only shows the range of sales. Visualization 3 only shows how large sales are for each country in relation to the total sales. Visualization 3 does not clearly show how much each country specifically sold.
